

No. 22/09 November 2010

Decision of Government no 1024/2010 to approve the National Strategy to limit the consequences of the undeclared work during 2010-2012 and to approve the Planning to implement the Strategy was published in Official Gazette no 1024/05.11.2010.

The document identifies the causes generating or facilitating the phenomenon of undeclared work, states measures to prevent the undeclared work and criteria to appreciate the efficiency of the strategy.

The causes are related to the legislative framework (bureaucracy, taxation system, lack of regulations regarding alternative ways to employ, such as for seasonal laborers, or excessive restrictions to cancel labor contracts) or to the mentality and attitude of employers and employees.

In spite of the conclusions regarding the causes, the measures are addressed only to employers and employees, such as: press campaign to inform the public regarding the disadvantages of undeclared work, increase of the controls performed by the labor inspectors, set up a mail box to be used by entities or persons to inform the authorities regarding such kind of situation without disclosing their identity, collaboration with other authorities with control attributes (Police, Financial Guard, others).

In consequence we estimate an increase of the controls performed by the labor inspectors regarding the compliance of the employers to the specific regulations.
